by Star Certification

PROFILE

Excluding the things that have been mentioned in the resume or the portfolio, I believe the quality of the work for me remains pretty fair and mutual in both individual and team-oriented scenarios. Besides learning environment lessons, my vision is to polish myself on React js for websites and react native for mobile app programming.

EXPERIENCE

FULL-STACK DEVELOPER

The Special Character IT Services | April 2021 to Present

Worked on the company's website as a full-stack developer with the use of ReactJS. Contributed in front-end by amazing framework nextJS and for backend, we have used Strapi with PostgreSQL.

Also have contributed to the mobile application using React Native. There was a Recipe App named Food Couture, a famous YouTuber in Gujarat needed a mobile application that can provide their recipe videos to all over the world.

EDUCATION

B.E (DEGREE ENGINEERING) IN COMPUTER ENGINEERING

Gujarat Technical University | 2018-22
